Work from home via VPN (for Students)

Listen

What is VPN and how is it of use to me as a student?

With a VPN you can access Europa-Universität Flensburg's internal network directly via the internet and then use services which are otherwise only available on campus such as, for example, access to files located on the server or to library catalogues which are not available otherwise.

Please log in with your student account (student ID number and password) to view the necessary information and installation files for VPN.
