## Project "Wheelie Student-Technology-Academy"

The "Wheelie Student-Technology-Academy" is a project funded by Schleswig-Holstein Innovation Foundation and Nordmetall Foundation within the framework of the lüttling program that should arouse the school students' interest and enthusiasm with regard to technical professions. Together with Flensburg Comenius School and a number of business enterprises from Schleswig-Holstein ninth and tenth graders experience technical thinking and practice on and with a contemporary technical system in a student-technology-academy: the Wheelie.
