Credits and Assessments

Students have to achieve 90 ECTS-credit points in three terms. 60 creditpoints are awarded after successful participation in the modules of the first and second term. Further 30 credit points are assigned to the Master Thesis in the third term.

Credit points are awarded after completion of a module and successful participation in a module assessment. The form of assessment depends on the topic of the module. Typical forms of assessment are presentations, papers, reports and written exams.
