Secretary

Welcome to the Interdisciplinary Centre for European Studies (ICES)

ICES is the central space for interdisciplinary research on Europe at Europa-Universität Flensburg. European integration is a complex process that continuously shapes society, politics and culture. The goal of ICES is to identify and research these processes from the perspectives of the **social** sciences and the humanities.

As the central point of contact for questions concerning European research for science, politics and civil society, ICES is devoted to supporting three areas: [1. research funding](#), [2. networking](#) and [3. the promotion of young and early-stage researchers](#).

At ICES, EUF researchers are networked across disciplines, institutes and universities. This enables us to work at an interdisciplinary level and thus to develop new explanatory approaches and innovative proposals.
