Information event on the VW Foundation's call 'Global Issues - Integrating Different Perspectives on Social Inequality'

Listen

Date: 3 July 2018, from 12.30 until 1.15 p.m. in RIGA 5

ICES and ZeBUSS jointly organise an information event about the recently published call "Global Issues - Integrating Different Perspectives on Social Inequality" of the VW Foundation. This call for funding is part of a broader international funding framework which aims to stimulate international research collaboration and to generate new insights on understudied issues in the context of the United Nations' sustainable development agenda.

All EUF staff members are cordially invited to come to the short presentation of the call's objective, thematic foci and general conditions, ask questions, and exchange on project ideas and potential cooperation.

Further information on the call are available on our website: <https://www.uni-flensburg.de/ices/aktuelle-ausschreibungen/#unfold-c72111>
