Networking

Listen

The aim of the ICES is to strengthen interdisciplinary cooperation within Europa-Universität Flensburg and foster networking with (potential) partners at home and abroad. We are happy to support EUF faculty, teaching and research staff who wish to set up and develop collaborative activities with colleagues from academia and representatives from politics, business and society.

In this vein, we welcome the opportunity to assist ICES-affiliated researchers with the organization of project meetings and symposia, and also organize events such as research colloquia and workshops. In the interests of promoting research, we help our members find suitable partners for the realization of their project ideas. ICES is also happy to ease the workload of EUF researchers during the grant application submission process by contact funding and advisory institutions on their behalf.
