## Campusengel

▶▶ Listen

The first semester students are cared for by the Campusengel of the Europa-Universität Flensburg from the end of August to the beginning of November. The Campusengel provide diverse support for questions about the start of studies in multiple languages.

It is the Campusengel's goal to help facilitate the needs of new students, make the initial orientation more comfortable and offer general support for any further questions as best as they can.

To achieve this goal, the Campusengel are well versed in information about enrollment, the campus, event locations, placement tests, language courses, housing, health insurance, child care and recommendations for free time activities in Flensburg.

The Campusengel, a team of German and international students, are all fluent in English and other foreign languages, specifically to tend to the needs of foreign students entering the University. Part of the team is made up of student assistants that work for the University and partly volunteers.
