Research Listen Our field of research comprises all economic aspects of content production and marketing by using various media . In this context, business models as a conceptional frame of reference for understanding any existing structures and designing new business fields particularly on the internet and in mobile media are a main focus. Special attention is currently paid in particular to Web 2.0 and social media accompanied by any challenges with regard to the marketing of media as well as advertizing services. Apart

-Wheelie The Department of Engineering and its Didactics has developed a working **model** in order to make the Wheelie easier "to learn". It consists of highly simplified components and has a material value of approx. € 40.00. Like the original, it has only got two wheels and can balance on the spot. At the same time, it can even be programmed by the school students. Due to the gradual reproduction of this **model** the school students were introduced into the functioning of the position control. Then, the **model** was embedded in lessons: Aspects, such as e.g. reading out the position sensor or controlling the gear
