[The Mini Wheelie](#)

</en/departement-of-technology-and-its-didactics/research/research-projects/wheelie/the-mini-wheelie/>

Relevance:  28%

-Wheelie The Department of Engineering and its Didactics has developed a working **model** in order to make the Wheelie easier "to learn". It consists of highly simplified components and has a material value of approx. € 40.00. Like the original, it has only got two wheels and can balance on the spot. At the same time, it can even be programmed by the school students. Due to the gradual reproduction of this **model** the school students were introduced into the functioning of the position control. Then, the **model** was embedded in lessons: Aspects, such as e.g. reading out the position sensor or controlling the gear

EU-topia? A critique of the European Union as a **model** [...] can and should serve as a **model** for governance beyond its own borders. Engaging the postcolonial literature, it proposes a critical analysis of the idea, dis- course and practice of Europe-as-a-**model**. We argue for a problematization of the label “**model**” without denying the value added by EU governance for the rest of the world. We start by developing an analytical heuristic that builds on three

Literature Mouchot, A. (1869). La chaleur solaire et ses applications industrielles. Paris. Mouchot's Solar Heater Listen Branch of study: thermodynamics Inventor: Augustin Mouchot, 1860s The Solar Heater on the **model** of Mouchot is a heliothermal engine by which food or water can be heated by solar radiation. Augustin Mouchot developed a string of heliothermal instruments amongst them a heliothermal steam engine. He was awarded a gold medal for the scope of his work on occasion of the 1878 Paris World Fair.
