Cooperation with the Fachhochschule Flensburg

» Listen

Together with the [Fachhochschule Flensburg](#), the Europa-Universität Flensburg is successfully working in many ways on the joint campus. Synergies in research and teaching are used in two scientific centers:

At the [Center for Sustainable Energy Systems \(ZNES\)](#), the two universities explore durable environmentally and climate-friendly energy systems and energy technologies.

Supported by both universities the [Dr. Werner Jackstädt Center for Entrepreneurship and SME \(DWJZ\)](#) is dedicated to economic, social and legal science-based exploration of the specific challenges, action requirements and design perspectives of entrepreneurs and SMEs.

By setting up a joint professorship in European Media Studies and establishing a new joint Flensburger Centre for European Media Research and Media Education this cooperation will reach a new level of quality in 2014.

In the area of youth development there are currently seven common promotion methods being developed and two methods have already been completed.

A secondary membership is promoted by the Land Schleswig-Holstein

In addition, the two universities cooperate in the framework of joint service facilities such as [Campus Career](#).
