

INTERNATIONAL WORKSHOP

POSTCOLONIAL EUROPEAN- CARIBBEAN ENTANGLEMENTS

Perspectives on Geographies of Responsibility and Reparatory Justice

25./26. June 2026 | Europa-Universität Flensburg | Room Helsinki 066

This workshop addresses past and present inequalities in the context of coloniality as the material condition of modern life. We want to discuss outlines of responsibility for radical care as we explore reparative conjunctures (Lewis 2024) and creative possibilities (Noxolo 2025). We want to focus our discussions on postcolonial places in Europe and the Caribbean and their multi-century entanglements. Places are the moments through which the global is constituted, invented, coordinated, produced (Massey 2004). Objective of our workshop is an interdisciplinary exploration and critical engagement with creativity, as current focus in Black studies and as necessary to Black life.
