Module title	Regional Economics 1 (Latin America)						
<p>At an introductory level, students will deal with questions of the political economy of regions in the Spanish-speaking nations. Both theoretical knowledge of the problems of regional economies and empirical problems are acquired.</p> <p>The module offers an overview of the political economy of regions of the Spanish-speaking world at an introductory level of reflection. For this purpose, individual topics that are important for regional economies of this economic area are intensively examined (e.g. political stability, ecological issues, poverty, income distribution, etc.).</p>
