

Poster work for the protection of the Wadden Sea

Task:

In the last few hours you have collected a lot of information on the Wadden Sea. To finalize this work you and your group will create a poster where you present the Wadden Sea. At the end we will hang your posters up in the school so your fellow students can learn about the Wadden Sea as well and also learn how to protect it.

Material needed:

Scissors, glue, felt tip pen, pencils for drawing.

Have fun!
