

Teaching Material on Biodiversity Conservation

Title: GEH e.V.

Author: Lena Siewerts

Quality Assessment: Carsten Hobohm (UF)

Level: secondary school (8th, 9th, 10th grade)

Type of material: Research on papers, answer questions

Aim: To provide information about the conservation of endangered breeds in Germany, Cooperation for conservation → Sponsorship

Access for the teacher

First you should show pictures of known endangered animals to the children, then you should ask them if they know what these animals have in common. (→ They are all endangered)

Then you should show the pictures of animals which are endangered in Germany and then you should ask again, if the kids know what these animals have in common with the others. (→ They are also endangered)

→ Prepared PowerPoint presentation

Webpages, the kids should work with: www.google.de

Worksheets with information from the GEH

The GEH assured me that their internet address will be working for many years and that for our research we are allowed to put a link to their website on our website.
