

eduroam für Studierende Installation auf MacBooks (macOS)

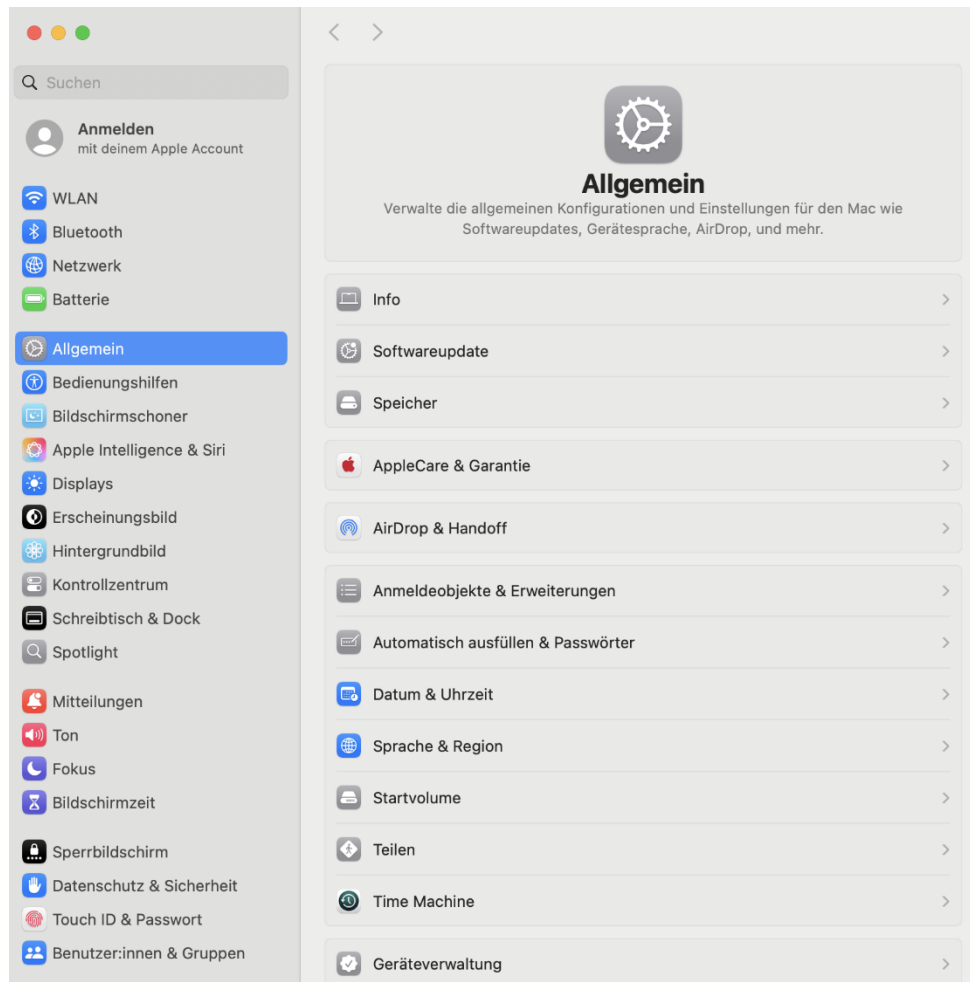

Step-for-Step Guide

You want to use Wi-Fi permanently on your MacBook? –
We'll show you how to do this easily on common devices.

Requirements for this guide:

1. You have a MacBook.
 2. You have a user account from EUF.
 3. You know your network access credentials.
 4. You have short-term internet access (e.g., mobile network).
 5. You can complete the first 4 steps at home using your home Wi-Fi.
Step 5 is only possible in the eduroam Wi-Fi on campus.
-

Step 1: Setup of eduroam Wi-Fi

**To set up eduroam, you need short-term internet access,
e.g., via your mobile network or the old alternative Wi-Fi "Uni-Studenten."**

1.1 Navigate to settings

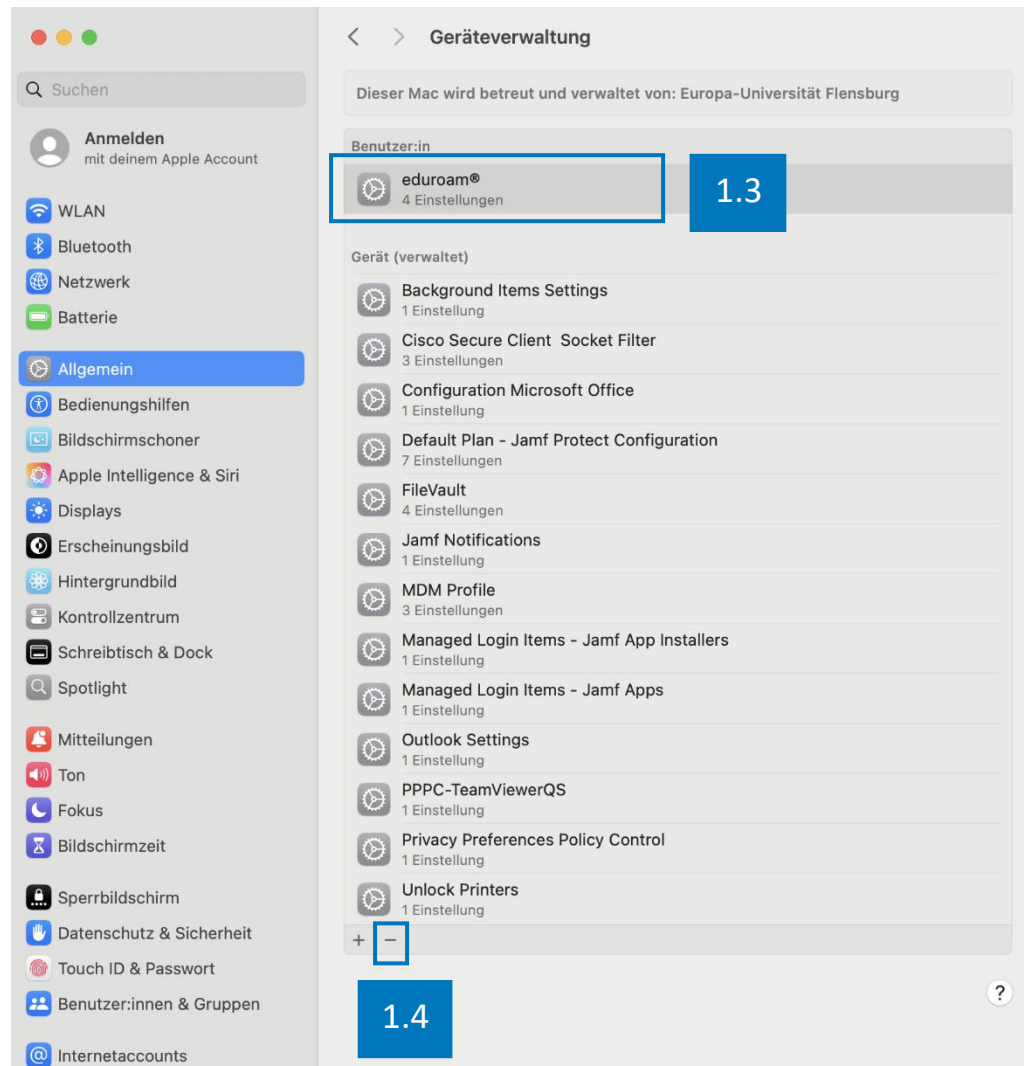

Settings > General

1.2 Navigate to device management

Settings > General > Device Management

1.3 If your MacBook has never been configured with eduroam, there's nothing to remove. Proceed to Step 2.

If available, click on the **eduroam configuration profile**.

1.4 Press below on

1.5 Confirm with **Remove**

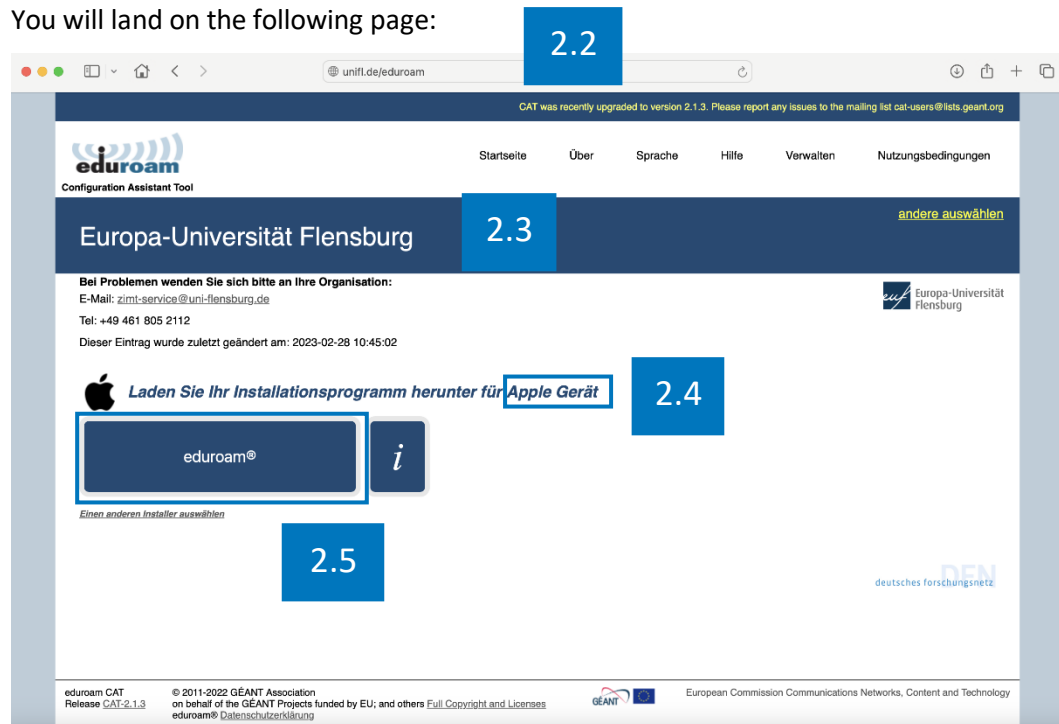

All eduroam-profiles are removed

Step 2: Download installation software

2.1 Open **Safari** (not Firefox, Chrome or similar).

2.2 Open the following URL or click the link: <https://unifl.de/eduroam>

You will land on the following page:

2.3 You are on the eduroam page of **Europa-Universität Flensburg**

2.4 Your device is automatically recognised as an apple device. If not, change it.

2.5 Click on the eduroam button.

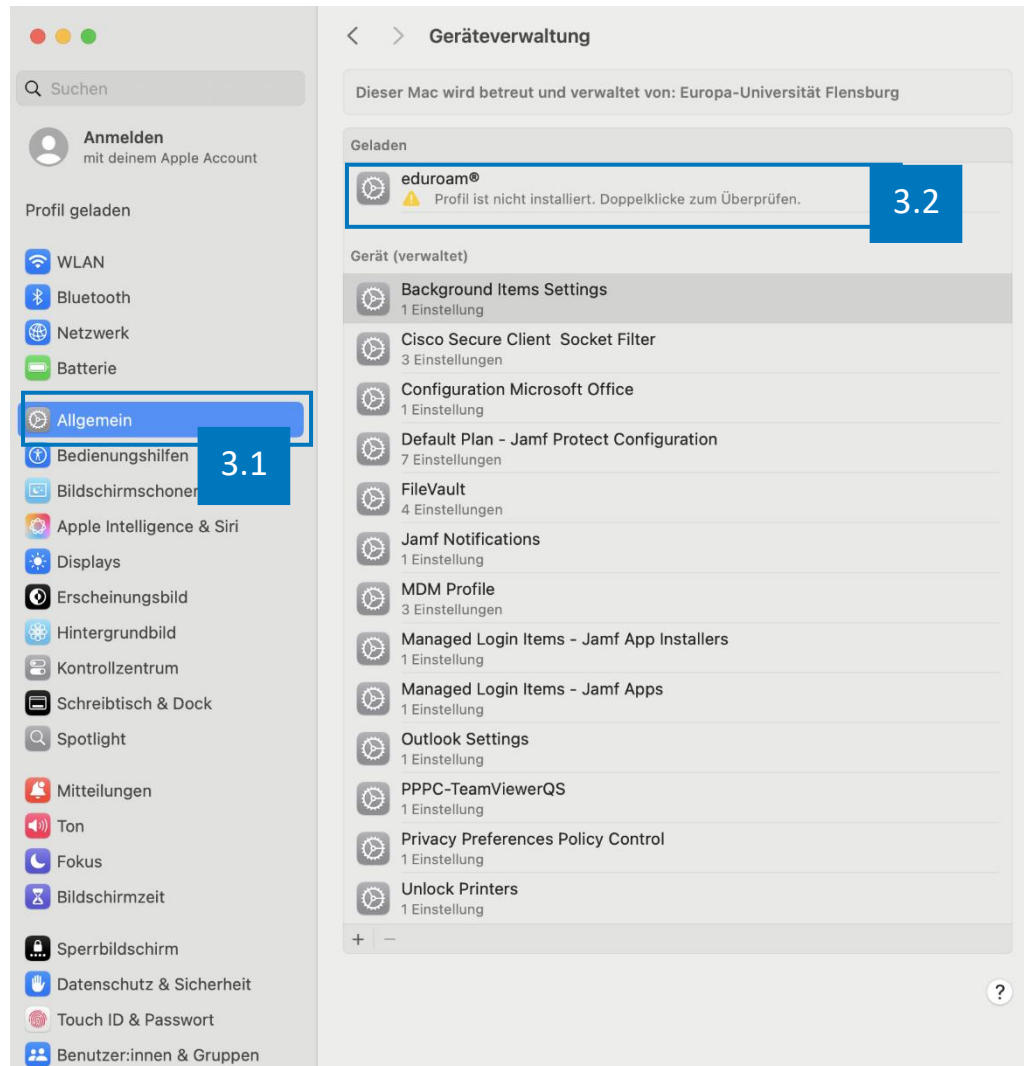

2.6 It now shows a window with **Profile loaded**. Click **OK**.

2.7 Close the browser.

2.6

Step 3: Install profile

3.1 Navigate back to Device Management in System Settings

System Settings > General > Device Management

3.2 Double-click on the eduroam profile under the Loaded section to open the profile window.
